

POSTLOCK

PRODUCT DATASHEET

PostLock is suitable to fix wooden, concrete and metal posts. The product is ready to use and requires no mixing.

APPLICATION

Dig hole to the recommended specification. Fill to about one third to half full with water. For sand soils, make a slurry mix with PostLock to line the sides. Position post vertically in hole, pour in PostLock at a consistent rate around the post while tamping to ensure thorough mixing. Bring dry powder up to surface of water. Add a small amount of extra water if any dry powder remains. Tamp surface to eliminate air voids. Align post to desired position. No bracing required. The post will set in approximately 8 to 12 minutes. Ensure weather conditions are taken into consideration.

EQUIPMENT CARE

Tools should be washed with water immediately after use.

PACKAGING

25kg paper bags- internal shower proof lining.

CONDITIONS

Do not use this product for general concreting, screeds, mortar, grout or render.

If a specified compressive strength is required, please consult our technical department.

QUALITY

This product is manufactured to quality control procedure in accordance with:

BS EN ISO 9001:2015.
FM 33290.
